To whom it may concern,

I am writing to recommend the services provided by 1300 Locate Pty. Ltd. I hired them on behalf of John Holland Pty Ltd(JH) for a project based in Woolloongabba between Oct. 2012 & Sept. 2013. The services provided were non-invasive detection of services and vacuum excavation to locate and identify services.

Initially 1300 Locate were hired on a task by task basis. Upon successful completion of a number of these individual sections of work, 1300 Locate were awarded the contract for the service location across the entire project.

This work consisted of traffic management, non-invasive detection followed by vacuum excavation, backfill & re-instatement of approx. 28 individual sites located in Woolloongabba, East Brisbane & Greenslopes. Upon completion of each location a detailed sketch was provided to JH outlining the services that were encountered in the works area. The onus was also on 1300 Locate to liaise with the service providers in order identify the services that were not listed on the Dial Before You Dig plans.

A number of these locations were in community and environmentally sensitive areas.

I dealt directly with Tony Festa and Angus Muir. I found them to be professional, skilled in their field and very much client orientated.

Should you require any further information feel free to give me a ring.

Yours sincerely
